

Here is an article [Witten:1997ep](#) [1], and here another [Li:1996mi](#) [2]. Then a wrong author: [Nobody:1997aa](#) [?] and a wrong label [Cheng:1996hh](#) [?] with ‘hh’ instead of ‘hc’. Then an eprint [hep-th/9703030](#) [3] and a personal label [DNS:94](#) [?] plus a commented out one. Then a label with an author whose last name has two words [deWit:1984px](#) [4]. Then label with no arxiv specified which will search the default arxiv [0101001](#) [5]. Finally, here is an article with the new arxiv numbering [0704.0001](#) [6].

Notice this file uses `utphys.bst` as a bibliography style. Any other style may be used.

This file also uses the package `showkeys` to show the names of the citation keys.
